

Son of Julius (Jule) & Minnie "Sims" Smith

Note: Jule and Minnie were the parents of five children. All lived to extended adulthood except James Frank. He was the victim of a sad most unusual infant death. He only lived one month. However according to an interview with his mother in 1984 he had the appearance of being a healthy baby. When he became ill and died suddenly the doctor informed her that he was most likely the victim of an aggressive widow spider bite. It was never ascertained when, exactly where or how the spider entered into James Frank's domicile. His mother stated perhaps he was brought into the house with garden vegetables.
